

FUNCTIONAL CAPACITY EVALUATIONS

Rehabilitation Services Otago Ltd has been providing Functional Capacity Evaluations and assessment of specific work tolerances for businesses, Accident Compensation Corporation and Insurance companies for the past ten years.

These specialised functional evaluations are conducted by Physiotherapists, Occupational Therapists and Ergonomists over a three hour (two days) timeframe.

The Functional Capacity Evaluation identifies:

- Strength, endurance, and work tolerance for specific and simulated work tasks.
- General abilities in standing, sitting and manual handling tolerances.
- General fitness and physical tolerances.

Over the past few years at clients' request, we have modified the Functional Capacity Evaluation to provide a Physical Vitae which can be appended to the Curriculum Vitae when applying for a job.

Rehabilitation Services Otago Ltd has a wide range of equipment for simulating work tasks. Alternative arrangements can be made to come to the workplace to trial specific equipment and work tasks.

For further information on Functional Capacity Evaluations, please contact

Andrea Mosley at: mosleyrehab@xtra.co.nz Mobile: 021 572 811.
